21	Ehab Essa, Karima Omar, Ali Alqahtani	Fake News Detection Based on a Hybrid BERT and LightGBM Models	2023
22	Ashfia Jannat Keya, Hasibul Hossain Shajeeb, Md. Saifur Rahman, M. F. Mridha	FakeStack: Hierarchical Tri-BERT-CNN-LSTM Stacked Model for Effective Fake News Detection	2023
23	Xiaochang Fang, Hongchen Wu, Jing Jing, Yihong Meng, Bing Yu, Hongzhu Yu, Huaxiang Zhang	NSEP: Early Fake News Detection via News Semantic Environment Perception	2024
24	Shiza Maham, Abdullah Tariq, Muhammad Usman Ghani Khan et al.	ANN: Adversarial News Net for Robust Fake News Classification	2024
25	Bledar Fazlija, Ismet Bakiji, Visar Dauti	FinFakeBERT: Financial Fake News Detection	2025
26	Mahmood Farokhian, Vahid Rafe, Hadi Veisi	Fake News Detection Using Parallel BERT Deep Neural Networks	2022

Dataset Used	Methodology Used	Limitation of the Paper
Custom news dataset + Horne & Adali dataset	N-grams, TF/TF-IDF, KNN, SVM, Logistic Regression, Decision Tree, SGD	Performance decreases with higher n-grams
LIAR	Dataset creation, NLP/ML baselines	Short statements make full-news detection difficult
FakeNewsAMT + Celebrity dataset	Linguistic features + machine learning	Relatively small datasets
BuzzFeed + PolitiFact	RNN + user/source behavior + integration	Requires social/user information
BuzzFeed + PolitiFact	News-user-publisher relationship modeling	Depends on social-context information
PolitiFact + GossipCop	News content + social context + temporal information	Data collection affected by platform restrictions
Weibo + WeChat	CNN + event adversarial learning	New/unseen events remain challenging
Real-world text-image fake-news datasets	Text + image features, CNN	Requires multimodal information
Public fake-news dataset	Self multi-head attention + CNN	Mainly focuses on content
Multimodal social-media datasets	Variational autoencoder + binary classifier	More computationally complex
Twitter MediaEval 2016 + Weibo	BERT + VGG-19 + multimodal fusion	Requires both text and image
BuzzFeed + PolitiFact	Sentence-comment co-attention	Requires user comments
PolitiFact + GossipCop	Text-image similarity + neural networks	Multimodal data is required
Social-media fake-news datasets	Graph representation + semi-supervised learning	Social graph information required
Fake/Real News dataset	BERT + parallel CNN layers	Computationally expensive

Three fake-news datasets	ML, deep learning and BERT comparison	Dataset bias can affect results
Fake/Real News datasets	BERT + LIME + Anchors	Focuses mainly on explainability
RumourEval-19 + Weibo-16 + Weibo-20	Publisher emotion + social emotion + BiGRU	Emotion features may be domain-dependent
Weibo21	Mixture of Experts + domain gate	Mainly designed for multi-domain/social data
English + Chinese fake-news datasets	English + Chinese fake-news datasets	Future data distribution can change
ISOT + TI-CNN + FNC	BERT + LightGBM	Transformer model requires more resources
Kaggle Fake News dataset + LIAR + WELFake	BERT + CNN + LSTM stacking	Complex architecture
Chinese + English datasets	GCN + multi-head/sparse attention	Requires social post information
Random Political + BuzzFeed + LIAR + FNC-1	Adversarial training + BERT + Longformer	More complex training
DataCorpus + financial fake-news datasets	Fine-tuned BERT	Focused mainly on financial news
Fake/Real News Dataset	Two parallel BERT networks + MaxWorth algorithm	BERT has input-length limitations for long news articles
